9 is an integer so 29" is an integer p2 is an integer is divisible by 2 SO P is divisible by 2. Let parm where m is the integer  $(2m)^2 = 29^2$   $4m^2 = 29^2$ Thus it follows that 9 is also divisible 642 hence P& 9 are both divisible by 2 which contradiction the hypothenis that Pf 9 have a no common factor Thus is no vational number whose Square is a 2) show that their is no rational number whose square is 5 Ans :- proof :- If possible their exist a rational number 1974 0 where , p & 9 are the integers primes to each other square is s. whose  $\left(\frac{\rho}{q}\right) = 5$  $\frac{p^2}{q^2} = 5$ OPPO F19 Pro
